Ground terminal block, 2022 Series, green-yellow

This ground terminal block (item number 2022-1307) streamlines wire connections, making them both quick and easy. Pluggable rail-mount terminal blocks are hugely popular in switchgear and control systems, for example, in railroad technology. They combine the best of rail-mount terminal blocks and connectors for the perfect solution. Variable wiring systems make pre-assembly easy, which leads to considerable time and cost savings in production, installation, operation, and maintenance. Conductors should only be connected to this ground terminal block if their strip length is between 10 mm and 12 mm. This product features conductor terminals and utilizes Push-in CAGE CLAMP®. Push-in CAGE CLAMP® connection technology is ideal for connecting all conductor types. Both solid and fine-stranded conductors with ferrules can be plugged in without needing to use any tools—all thanks to its pluggable design. Depending on the conductor type, this ground terminal block is designed for conductor cross sections ranging from 0.25 mm² to 4 mm². It comes with one level and two clamping points for connecting a single potential. The green-yellow housing is made of polyamide (PA66) for insulation. This pluggable rail-mount terminal block is operated with an operating tool. These pluggable rail-mount terminal blocks are mounted using DIN-35 rails.. Conductors made of copper can be connected via front-entry wiring.

Notes		
Safety Information	A separator plate (Item No. 209-191) or a 10 mm end stop (Item No. 249-117) must be placed at the end of a WAGO X-COM®-SYSTEM terminal strip.

Installation Notes

Installation

Snap individual carrier terminal blocks on to the DIN-rail and slide together.

Open the assembly by laterally sliding a block via operating tool (3.5 x 0.5 mm blade).

Separate terminal block assembly and slide individual terminal blocks laterally using an operating tool.

Conductor termination

Push-in CAGE CLAMP® enables solid conductors to be connected by simply pushing them into the unit.

Commoning

Commoning X-COM®S-SYSTEM Terminal Blocks using jumpers for TOPJOB® S Terminal Blocks. An end plate provides connection to TOPJOB® S Terminal Blocks. 2020 and 2022 Series Terminal Blocks are combinable. Jumper slots are on the same level for both series.

Pairing push-in comb style jumpers.

Commoning with push-in type wire jumper.

Testing

Test plug adapter (Item No. 2009-174) for 4 mm test plugs or banana plugs – also suitable for X-COM®S-SYSTEM-MINI Terminal Blocks.

Coding

Insert coding pin into the corresponding slot and twist it off.

Coding a female plug: remove coding finger using a suitable tool.

Insert a coding pin (Item No. 2022-100) into the corresponding location of the carrier terminal block.

Marking

Clear marking via large marking area

Group marking with height-adjustable group marker carrier (Item No. 2009-163)

Security

Carrier terminal blocks and female plugs are touch-proof.
